A storm is brewing in healthcare. Health care costs are escalating, patient expectations are rising, competition is becoming increasingly aggressive, and change is happening.

The Navigating Our Future program is designed to help the health-care provider grasp this emerging big picture of health care. Using a Learning Map as the prompt for dialogue, participants will explore the complex landscape of today’s pediatric healthcare market. The goal of the learning experience will be to create an awareness of the current healthcare environment and those external forces which are impacting you and your practice’s decision-making as well as determine what next steps to take to personally adapt to it.

Accreditation

Cincinnati Children’s Hospital Medical Center is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

These activities have been approved for *AMA PRA Category 1 Credit™*.
